## **ESSIC Affiliations & Acknowledgements**

There have been some questions about whether ESSIC/UMD must be the primary affiliation. We have checked government policies for Cooperative Agreements, and have found instruction that Cooperative Institute and other Grantees should not use the Federal funder as a primary affiliation.

ESSIC affiliations and acknowledgement should be used for all publications, presentations and abstract submissions.

Note – if you are affiliated with CISESS, you should use their specific guidance - <https://cisess.umd.edu/about-us/affiliations-acknowledgements/>
